WALK ON WALK OFF SERVICE

For many mare owners that are reluctant or unable to leave their mare at the stud the stallion is standing at, we can set your mare up to be in season prior to transport to the stud for live cover. Once in season, arrangements are made for the mare to be covered by the stallion and a suitable ovulation drug is administered so that the mare can be covered the once and returned home in the same trip

On arrival your mare will be scanned to determine what stage she is at in her breeding cycle, if problems are detected that may impact her chances of conceiving these can be discussed and a plan with an estimate of costs will be provided. In some instances, we may administer the hormone prostaglandin (PG) to induce your mare to cycle. Several scans may be required to set your mare up to be at the right stage of oestrous (horsing/standing heat) for cover. Once we determine the follicle is the correct size to be induced to ovulate, the mare is booked to the stallion and a suitable ovulation drug is administered. 24 hours after cover we will scan your mare again to ensure that she has ovulated and book the pregnancy scan in 14 days times.

Our walk on, walk off service fee includes all scans up to and including the 14 day scan, as well as prostaglandin and/or sedation injections, if required and the ovulation medication.

We recommend that your mare be vaccinated against tetanus, strangles and Hendra prior to breeding. Worming and hoof trimming prior to arrival are also recommended.

The walk on, walk off service fee for 2021 season is \$267.50/cycle

Please complete the form overleaf

MARE BREEDING FORM

Name of mare owner: _____

Postal address: _____

_____ Postcode: _____

Best contact number: _____

Email address: _____

Name of mare: _____ Brand: _____

Mare registration details (society/ID number): _____

Is your mare caslicked? YES / NO

Mare health status:

Please provide last date performed or administered. Write N/A if not done or unknown date.

Tetanus vaccination: _____ Strangles vaccination: _____

Hendra vaccination: _____ Worming: _____

Farrier: _____

Special instructions/things we should know about your mare:

I understand and accept the following:

I have been advised as to the nature of the procedures and the risks involved. While all reasonable precautions and due care will be taken to ensure the safety of your mare, veterinary procedures, agistment and live cover have their inherent risks that cannot be completely eliminated that can lead to illness, injury or death. Should an illness or injury occur we will treat your mare appropriately and make immediate contact to discuss the problem, prognosis and estimate of fees. I realise that results cannot be guaranteed and further treatment options may be necessary however understand that these will be discussed and consented to prior to commencement. I assume financial responsibility for all charges incurred including that through illness or injury, should it occur. I understand that payment is required before the mare returns home.
